

# UNDERGROUND SCIENCE CAFÉ

## An Unexpected TeA Party

**Dr. Shaun Hall**

SNOLAB

**Friday, Oct. 25 - Surface Edition**

Fraser Duncan Auditorium Side B

9am, 10am

SNOLAB is an extremely unique environment.

At SNOLAB we have accomplished great feats, and that is often in spite of seemingly insurmountable challenges. A recent example of a question from colleagues in our community highlights this well:

*“How on earth did you manage to put a metal-acid purification plant 2 kilometers underground?”*

Well... how did we do it?

**Safely and Together.**

Please join us during your coffee break for an unexpected TeA party!
