

UNDERGROUND SCIENCE CAFÉ

Hip Hip Hooray for Double Beta Decay!

Dr. Erica Caden

SNOLAB

Tuesday, Dec. 10 - Underground

Underground Conference Room

10am and 2pm

Double Beta Decay is a rare reaction that could explain how we are here. Observing it is very difficult, and we need the deepest clean lab in the world to do so. This is where SNOLAB comes in.

Underground Science Cafe talks are for all SNOLAB staff and users. If you're wondering if this talk is for you ... then it is absolutely and especially for you!

Share your coffee break with us and learn something amazing!
