

BENEATH THE ROCK / BEYOND THE VISIBLE

A PUBLIC EVENT

PART OF THE
BENEATH/BEYOND
SUMMER SERIES

DR. CHRISTINE KRAUS
SNOLAB

DR. STEPHEN SEKULA
SNOLAB

Most of the universe cannot be seen ... except, perhaps, if we first go deep underground and then look out toward the stars.

Why do we go underground? What makes up the unseen universe? How important is the invisible? This engaging and interactive event will take participants on a quick tour of the mysterious *neutrino* and even-more-mysterious *dark matter*.
