

# UNDERGROUND SCIENCE CAFÉ

## REPAIR: Undoing the Damage

**Dr. Mike Lapointe**  
SNOLAB

**Surface Edition**  
**January 27, 2026**  
Shows at: 10:30am, 2:00pm  
Fraser Auditorium

*Radiation, like rain in a rain forest, is a constant on Earth. Life evolved to adapt to this steady downpour of radiation, and it might even depend on it! What happens when that radiation becomes just a drizzle or drought? What does that mean for life? Let's catch up with the REPAIR project and see what the latest results tell us.*

Underground Science Cafe talks are for all SNOLAB staff and users. If you're wondering if this talk is for you ... then it is absolutely and especially for you! Snacks are provided. Share your coffee break with us and learn something amazing!
